Review

Drilling of fiber reinforced plastics: A review. 1
A.M. Abrão, P.E. Faria, J.C.C. Rubio, P. Reis, J.P. Davim

Processing of mesoporous silica materials (MCM-41) from coal fly ash. 8
H. Misran, R. Singh, S. Begum, M.A. Yarmo

A criterion for shear banding localization in polycrystalline FCC metals and alloys and critical working conditions for different microstructural variables 14
A.A.S. Mohammed, E.A. El-Danaf, A.A. Radwan

Evaluation of copper coating ratio in steel/copper clad wire drwaing 22
D.C. Ko, S.K. Lee, B.M. Kim, H.H. Jo, H. Jo

Influence of the structure of blanked materials upon the blanking quality of copper alloys 27
F. Gréban, G. Monteil, X. Roizard

The effect of the welding temperature on the weldability in diffusion welding of martensitic (AISI 420) stainless steel with ductile (spheroidal graphite-nodular) cast iron 33
S. Kolukisa

Finite element modeling of transmission laser microjoining process 37
T. Mahmood, A. Mian, M.R. Amin, G. Auner, R. Witte, H. Herfurth, G. Newaz

An experimental study on some formability evaluation methods in negative incremental forming. 45
G. Hussain, L. Gao, N.U. Dar

Deagglomeration treatment in the synthesis of doped-ceria nanoparticles via coprecipitation route. 54
S.-Y. Yao, Z.-H. Xie

A multicriteria flowshop scheduling problem with setup times 60
T. Eren

Simulation of chip formation during high-speed cutting 66
C. Hortig, B. Svendsen

Cold roll forming of a U-channel made of high strength steel 77
M. Lindgren

Modelling and multi objective optimization of LM24 aluminium alloy squeeze cast process parameters using genetic algorithm. 82
P. Vijian, V.P. Arunachalam

Diffusion bondability of similar/dissimilar light metal sheets 87
J. Ziegelheim, S. Hiraki, H. Ohsawa

A357 thixoforming feedstock produced by cooling slope casting 94
Y. Birol

Preparation, characterization and gas permeation properties of carbon hollow fiber membranes based on Matrimid® 5218 precursor. . . . 102
E.P. Favvas, G.C. Kapantaidakis, J.W. Nolan, A.Ch. Mitropoulos, N.K. Kanellopoulos

Analysis and elimination of the stretcher strains on TH415 tinplate rings in the stamping process 111
T. Pepelnjak, B. Barisic

An analysis of springback in sheet metal bending using finite element method (FEM) 120
S.K. Panthi, N. Ramakrishnan, K.K. Pathak, J.S. Chouhan

Aluminum foil: Its typical quality problems and their causes 125
O. Keles, M. Dundar

Elsevier B.V.

Modeling of temperature distribution in ultrasonic welding of thermoplastics for various joint designs 138
K.S. Suresh, M.R. Rani, K. Prakasan, R. Rudramoorthy

Prediction of neutral plane and effects of the process parameters in radial forging using an upper bound solution 147
M. Sanjari, A. Karimi Taheri, A. Ghaei

Modeling of electrical discharge machining process using back propagation neural network and multi-objective optimization using non-dominating sorting genetic algorithm-II 154
D. Mandal, S.K. Pal, P. Saha

Analytical relations between hardness and strain for cold formed parts 163
F.O. Sonmez, A. Demir

Simulation of transport processes in squeeze casting 174
H. Chattopadhyay

Modelling the effects of superimposed ultrasonic vibrations on tension and compression tests of aluminium 179
Y. Daud, M. Lucas, Z. Huang

Prediction and verification of temperature evolution as a function of ram speed during the extrusion of AZ31 alloy into a rectangular section ... 191
G. Liu, J. Zhou, J. Duszczyk

Structure of the continuously cast Ni-based superalloy GMR 235 200
F. Zupanič, T. Bončina, G. Lojen, B. Markoli, S. Spaić

The impact of ISO 9000 quality management systems on manufacturing 207
T. Koc

Effect of layered microstructure on superplastic forming property of AA8090 Al–Li alloy 214
V. Pancholi, B.P. Kashyap

Yield function calibration for orthotropic sheet metals based on uniaxial and plane strain tensile tests 221
H. Aretz, O.S. Hopperstad, O.-G. Lademo

Influence of grain refinement and modification on dry sliding wear behaviour of Al–7Si and Al–7Si–2.5Cu cast alloys 236
K.G. Basavakumar, P.G. Mukunda, M. Chakraborty

Clustering effect on high temperature tensile behaviour of vanadium microalloyed steel 246
S. Gündüz, R.C. Cochrane

Parameterization of micro-hardness distribution in granite related to abrasive machining performance 253
J. Xie, J. Tamaki

Influence of thermal curing on the fabrication and properties of thin organosilane films coated on low carbon steel substrates 259
X. Wang, G. Li, A. Li, Z. Zhang

Delamination analysis in drilling process of glass fiber reinforced plastic (GFRP) composite materials 265
N.S. Mohan, S.M. Kulkarni, A. Ramachandra

Influence of roller burnishing contact width and burnishing orientation on surface quality and tribological behaviour of Aluminium 6061 272
N.S.M. El-Tayeb, K.O. Low, P.V. Brevern

Analysis of the surface roughness of tangential turn-milling for machining with end milling cutter 279
V. Savas, C. Ozay

Mechanical behavior of lightweight thermoplastic fiber–metal laminates 284
G. Reyes, H. Kang

Microstructures and failure mechanisms of friction stir spot welds of aluminum 6061-T6 sheets 291
D.-A. Wang, S.-C. Lee

Effect of cryogenic treatment on the mechanical properties of 4340 steel 298
S. Zhirafar, A. Rezaeian, M. Pugh

Application of small-hole dry drilling in bimetal part 304
X. Song, J. Lieh, D. Yen

Evaluation of surface quality and adhesion strength of treated solid wood 311
T. Ozdemir, S. Hiziroglu

Influence of heat treatment on the microstructure and stress rupture property of DZ951 alloy 315
P.C. Xia, J.J. Yu, X.F. Sun, H.R. Guan, Z.Q. Hu

Manufacturing process diagnosis using functional regression 323
W. Li

Laser deposited TiC/H13 tool steel composite coatings and their erosion resistance 331
W.H. Jiang, R. Kovacevic

ANN constitutive model for high strain-rate deformation of Al 7075-T6 339
J. Sheikh-Ahmad, J. Twomey

Process simulation of micro electro-discharge machining on molybdenum 346
P. Allen, X. Chen

Manganese oxide films for electrochemical supercapacitors 356
J. Wei, N. Nagarajan, I. Zhitomirsky

Structure and mechanical properties of TiBN coatings fabricated by dc reactive sputtering technique 362
L. García-González, J. Hernández-Torres, P.J. García-Ramírez, J. Martínez-Castillo, Á. Sauceda, A.L. Herrera-May, F.J. Espinoza-Beltrán

Short communication

TiO_2–SiO_2 composite filler for thin paper 367
J.-K. Park, J.-K. Kim, H.-K. Kim

Journal of Materials Processing Technology 186 (2007) 371–375

Journal of Materials Processing Technology

www.elsevier.com/locate/jmatprotec

Subject Index of Volume 186

Abrasive machining
Parameterization of micro-hardness distribution in granite related to abrasive machining performance, 253
Adhesion
Influence of thermal curing on the fabrication and properties of thin organosilane films coated on low carbon steel substrates, 259
Adhesion strength
Evaluation of surface quality and adhesion strength of treated solid wood, 311
Adiabatic shear-banding
Simulation of chip formation during high-speed cutting, 66
Air cooling
Application of small-hole dry drilling in bimetal part, 304
Al 7075
ANN constitutive model for high strain-rate deformation of Al 7075-T6, 339
Al alloy
Diffusion bondability of similar/dissimilar light metal sheets, 87
Al–7Si cast alloys
Influence of grain refinement and modification on dry sliding wear behaviour of Al–7Si and Al–7Si–2.5Cu cast alloys, 236
Al–7Si–2.5Cu cast alloys
Influence of grain refinement and modification on dry sliding wear behaviour of Al–7Si and Al–7Si–2.5Cu cast alloys, 236
Al–Li alloy
Effect of layered microstructure on superplastic forming property of AA8090 Al–Li alloy, 214
Aluminium
Aluminum foil: Its typical quality problems and their causes, 125
Modelling the effects of superimposed ultrasonic vibrations on tension and compression tests of aluminium, 179
Aluminium alloys
A357 thixoforming feedstock produced by cooling slope casting, 94
Application of small-hole dry drilling in bimetal part, 304
Analysis
Prediction of neutral plane and effects of the process parameters in radial forging using an upper bound solution, 147
Anisotropy
Yield function calibration for orthotropic sheet metals based on uniaxial and plane strain tensile tests, 221
ANOVA
Delamination analysis in drilling process of glass fiber reinforced plastic (GFRP) composite materials, 265
Artificial neural network (ANN)
Modeling of electrical discharge machining process using back propagation neural network and multi-objective optimization using non-dominating sorting genetic algorithm-II, 154
AZ31
Diffusion bondability of similar/dissimilar light metal sheets, 87
Beech
Evaluation of surface quality and adhesion strength of treated solid wood, 311
Bimetal material
Application of small-hole dry drilling in bimetal part, 304
Bioencapsulation
Finite element modeling of transmission laser microjoining process, 37
Blanking profile
Influence of the structure of blanked materials upon the blanking quality of copper alloys, 27
Brinell hardness
Analytical relations between hardness and strain for cold formed parts, 163
Bulge Profile
Effect of layered microstructure on superplastic forming property of AA8090 Al–Li alloy, 214
Burnishing orientation
Influence of roller burnishing contact width and burnishing orientation on surface quality and tribological behaviour of Aluminium 6061, 272
Burr
Influence of the structure of blanked materials upon the blanking quality of copper alloys, 27
Calibration
Yield function calibration for orthotropic sheet metals based on uniaxial and plane strain tensile tests, 221
Carbon membranes
Preparation, characterization and gas permeation properties of carbon hollow fiber membranes based on Matrimid® 5218 precursor, 102
Chestnut
Evaluation of surface quality and adhesion strength of treated solid wood, 311
Clusters
Clustering effect on high temperature tensile behaviour of vanadium microalloyed steel, 246
Coal fly ash
Processing of mesoporous silica materials (MCM-41) from coal fly ash, 8
Coating
Evaluation of surface quality and adhesion strength of treated solid wood, 311
Laser deposited TiC/H13 tool steel composite coatings and their erosion resistance, 331
Coating ratio
Evaluation of copper coating ratio in steel/copper clad wire drwaing, 22
Coatings
Structure and mechanical properties of TiBN coatings fabricated by dc reactive sputtering technique, 362
Cold forming
Analytical relations between hardness and strain for cold formed parts, 163

Elsevier B.V.
doi:10.1016/S0924-0136(07)00164-1

Cold roll forming
Cold roll forming of a U-channel made of high strength steel, 77
Competitive priorities
The impact of ISO 9000 quality management systems on manufacturing, 207
Composite
Laser deposited TiC/H13 tool steel composite coatings and their erosion resistance, 331
Compression tests
Modelling the effects of superimposed ultrasonic vibrations on tension and compression tests of aluminium, 179
Computer simulation
Prediction and verification of temperature evolution as a function of ram speed during the extrusion of AZ31 alloy into a rectangular section, 191
Constitutive model
ANN constitutive model for high strain-rate deformation of Al 7075-T6, 339
Contact moulding
Delamination analysis in drilling process of glass fiber reinforced plastic (GFRP) composite materials, 265
Continuous casting
Structure of the continuously cast Ni-based superalloy GMR 235, 200
Cooling slope casting
A357 thixoforming feedstock produced by cooling slope casting, 94
Coprecipitation
Deagglomeration treatment in the synthesis of doped-ceria nanoparticles via coprecipitation route, 54
Cryogenic
Effect of cryogenic treatment on the mechanical properties of 4340 steel, 298

Deagglomeration treatment
Deagglomeration treatment in the synthesis of doped-ceria nanoparticles via coprecipitation route, 54
Delamination
Drilling of fiber reinforced plastics: A review, 1
Delamination analysis in drilling process of glass fiber reinforced plastic (GFRP) composite materials, 265
Design of experiments
Delamination analysis in drilling process of glass fiber reinforced plastic (GFRP) composite materials, 265
Diagnosis
Manufacturing process diagnosis using functional regression, 323
Diffusion bonding
Diffusion bondability of similar/dissimilar light metal sheets, 87
Diffusion welding/bonding
The effect of the welding temperature on the weldability in diffusion welding of martensitic (AISI 420) stainless steel with ductile (spheroidal graphite-nodular) cast iron, 33
Doped-ceria
Deagglomeration treatment in the synthesis of doped-ceria nanoparticles via coprecipitation route, 54
Drilling
Drilling of fiber reinforced plastics: A review, 1
Dry machining
Application of small-hole dry drilling in bimetal part, 304
Ductile cast iron
The effect of the welding temperature on the weldability in diffusion welding of martensitic (AISI 420) stainless steel with ductile (spheroidal graphite-nodular) cast iron, 33
DZ951 alloy
Influence of heat treatment on the microstructure and stress rupture property of DZ951 alloy, 315

Effective strain
Analytical relations between hardness and strain for cold formed parts, 163
Electrical discharge machining (EDM)
Modeling of electrical discharge machining process using back propagation neural network and multi-objective optimization using non-dominating sorting genetic algorithm-II, 154
Electrodeposition
Manganese oxide films for electrochemical supercapacitors, 356
Energy dispersive X-ray spectrometer
Influence of thermal curing on the fabrication and properties of thin organosilane films coated on low carbon steel substrates, 259
0.632e error
ANN constitutive model for high strain-rate deformation of Al 7075-T6, 339
Erosion
Laser deposited TiC/H13 tool steel composite coatings and their erosion resistance, 331
Experiment
Evaluation of copper coating ratio in steel/copper clad wire drwaing, 22
Extrusion
Prediction and verification of temperature evolution as a function of ram speed during the extrusion of AZ31 alloy into a rectangular section, 191

Fatigue
Mechanical behavior of lightweight thermoplastic fiber–metal laminates, 284
Effect of cryogenic treatment on the mechanical properties of 4340 steel, 298
FCC materials
A criterion for shear banding localization in polycrystalline FCC metals and alloys and critical working conditions for different microstructural variables, 14
FE-analysis
Evaluation of copper coating ratio in steel/copper clad wire drwaing, 22
FEM
An analysis of springback in sheet metal bending using finite element method (FEM), 120
Process simulation of micro electro-discharge machining on molybdenum, 346
FEM simulation
Analysis and elimination of the stretcher strains on TH415 tinplate rings in the stamping process, 111
Finite element
Finite element modeling of transmission laser microjoining process, 37
Finite element analysis
Simulation of chip formation during high-speed cutting, 66
Cold roll forming of a U-channel made of high strength steel, 77
Finite element modelling
Modelling the effects of superimposed ultrasonic vibrations on tension and compression tests of aluminium, 179
Firm performance
The impact of ISO 9000 quality management systems on manufacturing, 207
Flow curve
Analytical relations between hardness and strain for cold formed parts, 163
Flowshop scheduling
A multicriteria flowshop scheduling problem with setup times, 60
Foil
Aluminum foil: Its typical quality problems and their causes, 125
Formability
Mechanical behavior of lightweight thermoplastic fiber–metal laminates, 284
Formability tests
An experimental study on some formability evaluation methods in negative incremental forming, 45

Forming limit diagram
Yield function calibration for orthotropic sheet metals based on uniaxial and plane strain tensile tests, 221
Fracture
Microstructures and failure mechanisms of friction stir spot welds of aluminum 6061-T6 sheets, 291
Friction
Modelling the effects of superimposed ultrasonic vibrations on tension and compression tests of aluminium, 179
Influence of roller burnishing contact width and burnishing orientation on surface quality and tribological behaviour of Aluminium 6061, 272
Friction stir spot weld
Microstructures and failure mechanisms of friction stir spot welds of aluminum 6061-T6 sheets, 291
Functional regression
Manufacturing process diagnosis using functional regression, 323

Gas separation
Preparation, characterization and gas permeation properties of carbon hollow fiber membranes based on Matrimid® 5218 precursor, 102
Genetic algorithm (GA)
Modelling and multi objective optimization of LM24 aluminium alloy squeeze cast process parameters using genetic algorithm, 82
Modeling of electrical discharge machining process using back propagation neural network and multi-objective optimization using non-dominating sorting genetic algorithm-II, 154
Glass fiber reinforced thermoplastics
Delamination analysis in drilling process of glass fiber reinforced plastic (GFRP) composite materials, 265
Grain refinement
Influence of grain refinement and modification on dry sliding wear behaviour of Al–7Si and Al–7Si–2.5Cu cast alloys, 236
Grain size
A criterion for shear banding localization in polycrystalline FCC metals and alloys and critical working conditions for different microstructural variables, 14
Granite
Parameterization of micro-hardness distribution in granite related to abrasive machining performance, 253

Hardness
Influence of roller burnishing contact width and burnishing orientation on surface quality and tribological behaviour of Aluminium 6061, 272
Structure and mechanical properties of TiBN coatings fabricated by dc reactive sputtering technique, 362
Heat transfer
Simulation of transport processes in squeeze casting, 174
Heat treatment
Influence of heat treatment on the microstructure and stress rupture property of DZ951 alloy, 315
Heuristic methods
A multicriteria flowshop scheduling problem with setup times, 60
High strain-rate
ANN constitutive model for high strain-rate deformation of Al 7075-T6, 339
High strength steel
Cold roll forming of a U-channel made of high strength steel, 77
High-speed cutting
Simulation of chip formation during high-speed cutting, 66
Hollow fiber
Preparation, characterization and gas permeation properties of carbon hollow fiber membranes based on Matrimid® 5218 precursor, 102
Hollow structural component
Diffusion bondability of similar/dissimilar light metal sheets, 87

Integer programming
A multicriteria flowshop scheduling problem with setup times, 60
ISO 9000
The impact of ISO 9000 quality management systems on manufacturing, 207

Joint designs
Modeling of temperature distribution in ultrasonic welding of thermoplastics for various joint designs, 138

Lap-shear specimen
Microstructures and failure mechanisms of friction stir spot welds of aluminum 6061-T6 sheets, 291
Laser joining
Finite element modeling of transmission laser microjoining process, 37
Laser parameters
Finite element modeling of transmission laser microjoining process, 37
Laser processing
Laser deposited TiC/H13 tool steel composite coatings and their erosion resistance, 331
Location of neutral plane
Prediction of neutral plane and effects of the process parameters in radial forging using an upper bound solution, 147
Lueders' bands phenomenon
Analysis and elimination of the stretcher strains on TH415 tinplate rings in the stamping process, 111

Magnesium alloys
Prediction and verification of temperature evolution as a function of ram speed during the extrusion of AZ31 alloy into a rectangular section, 191
Manganese oxide film
Manganese oxide films for electrochemical supercapacitors, 356
Manufacturing parameters
The impact of ISO 9000 quality management systems on manufacturing, 207
Manufacturing processes
Manufacturing process diagnosis using functional regression, 323
Martensitic stainless steel
The effect of the welding temperature on the weldability in diffusion welding of martensitic (AISI 420) stainless steel with ductile (spheroidal graphite-nodular) cast iron, 33
Mathematical modeling
Modeling of temperature distribution in ultrasonic welding of thermoplastics for various joint designs, 138
Maximum wall angle
An experimental study on some formability evaluation methods in negative incremental forming, 45
Mechanical properties
Effect of cryogenic treatment on the mechanical properties of 4340 steel, 298
Mesh dependence
Simulation of chip formation during high-speed cutting, 66
Mesoporous silica
Processing of mesoporous silica materials (MCM-41) from coal fly ash, 8
Microalloyed steel
Clustering effect on high temperature tensile behaviour of vanadium microalloyed steel, 246
Micro-EDM
Process simulation of micro electro-discharge machining on molybdenum, 346
Micro-hardness distribution
Parameterization of micro-hardness distribution in granite related to abrasive machining performance, 253
Microstructure
Structure of the continuously cast Ni-based superalloy GMR 235, 200
Effect of layered microstructure on superplastic forming property of AA8090 Al–Li alloy, 214

Microstructures and failure mechanisms of friction stir spot welds of aluminum 6061-T6 sheets, 291
Influence of heat treatment on the microstructure and stress rupture property of DZ951 alloy, 315
Laser deposited TiC/H13 tool steel composite coatings and their erosion resistance, 331
Minimal load condition
An analysis of springback in sheet metal bending using finite element method (FEM), 120
Modification
Influence of grain refinement and modification on dry sliding wear behaviour of Al–7Si and Al–7Si–2.5Cu cast alloys, 236
Multicriteria
A multicriteria flowshop scheduling problem with setup times, 60
Multi-objective optimization
Modelling and multi objective optimization of LM24 aluminium alloy squeeze cast process parameters using genetic algorithm, 82
Modeling of electrical discharge machining process using back propagation neural network and multi-objective optimization using non-dominating sorting genetic algorithm-II, 154
Multiple simultaneous faults
Manufacturing process diagnosis using functional regression, 323
Multivariable linear regression
Modelling and multi objective optimization of LM24 aluminium alloy squeeze cast process parameters using genetic algorithm, 82

Nanocomposite
TiO_2–SiO_2 composite filler for thin paper, 367
Nanoindentation
Structure and mechanical properties of TiBN coatings fabricated by dc reactive sputtering technique, 362
Negative incremental forming
An experimental study on some formability evaluation methods in negative incremental forming, 45
Neural networks
ANN constitutive model for high strain-rate deformation of Al 7075-T6, 339
Neutron diffraction
Effect of cryogenic treatment on the mechanical properties of 4340 steel, 298
Ni-based superalloy
Structure of the continuously cast Ni-based superalloy GMR 235, 200
Nitrogen porosimetry
Preparation, characterization and gas permeation properties of carbon hollow fiber membranes based on Matrimid® 5218 precursor, 102
Numerical analysis
Process simulation of micro electro-discharge machining on molybdenum, 346

Oil absorption
TiO_2–SiO_2 composite filler for thin paper, 367
Opacity
TiO_2–SiO_2 composite filler for thin paper, 367
Optimisation
Analysis and elimination of the stretcher strains on TH415 tinplate rings in the stamping process, 111
Organosilane films
Influence of thermal curing on the fabrication and properties of thin organosilane films coated on low carbon steel substrates, 259

Paper filler
TiO_2–SiO_2 composite filler for thin paper, 367
Pine
Evaluation of surface quality and adhesion strength of treated solid wood, 311
Pinholes
Aluminum foil: Its typical quality problems and their causes, 125
Plane strain compression
A criterion for shear banding localization in polycrystalline FCC metals and alloys and critical working conditions for different microstructural variables, 14
Polymer-matrix composites
Drilling of fiber reinforced plastics: A review, 1
Precipitates
Influence of the structure of blanked materials upon the blanking quality of copper alloys, 27
Precipitation
Manganese oxide films for electrochemical supercapacitors, 356
Process fusion
Diffusion bondability of similar/dissimilar light metal sheets, 87
Process variables
Evaluation of copper coating ratio in steel/copper clad wire drwaing, 22
Pyrolysis
Preparation, characterization and gas permeation properties of carbon hollow fiber membranes based on Matrimid® 5218 precursor, 102

Radial forging
Prediction of neutral plane and effects of the process parameters in radial forging using an upper bound solution, 147
Reduction
Manganese oxide films for electrochemical supercapacitors, 356
Reflection–absorption infrared spectroscopy
Influence of thermal curing on the fabrication and properties of thin organosilane films coated on low carbon steel substrates, 259
Resistance spot welding
Manufacturing process diagnosis using functional regression, 323
Rolling
Aluminum foil: Its typical quality problems and their causes, 125
Roughness
Evaluation of surface quality and adhesion strength of treated solid wood, 311

Saturation bending
An analysis of springback in sheet metal bending using finite element method (FEM), 120
Segregation
Simulation of transport processes in squeeze casting, 174
Semi-solid forming
A357 thixoforming feedstock produced by cooling slope casting, 94
Setup times
A multicriteria flowshop scheduling problem with setup times, 60
Shear bands
A criterion for shear banding localization in polycrystalline FCC metals and alloys and critical working conditions for different microstructural variables, 14
Sheet metal forming
An analysis of springback in sheet metal bending using finite element method (FEM), 120
Yield function calibration for orthotropic sheet metals based on uniaxial and plane strain tensile tests, 221
Simple compression
A criterion for shear banding localization in polycrystalline FCC metals and alloys and critical working conditions for different microstructural variables, 14
Simple lap shear
Diffusion bondability of similar/dissimilar light metal sheets, 87
Simulation
An analysis of springback in sheet metal bending using finite element method (FEM), 120
Simulation of transport processes in squeeze casting, 174
Sine law
An experimental study on some formability evaluation methods in negative incremental forming, 45
Small-hole drilling
Application of small-hole dry drilling in bimetal part, 304

Sol–gel methods
TiO_2–SiO_2 composite filler for thin paper, 367
Solidification
Simulation of transport processes in squeeze casting, 174
Structure of the continuously cast Ni-based superalloy GMR 235, 200
Springback
An analysis of springback in sheet metal bending using finite element method (FEM), 120
Spruce
Evaluation of surface quality and adhesion strength of treated solid wood, 311
Squeeze casting
Modelling and multi objective optimization of LM24 aluminium alloy squeeze cast process parameters using genetic algorithm, 82
Simulation of transport processes in squeeze casting, 174
Stacking fault energy (SFE)
A criterion for shear banding localization in polycrystalline FCC metals and alloys and critical working conditions for different microstructural variables, 14
Stamping
Analysis and elimination of the stretcher strains on TH415 tinplate rings in the stamping process, 111
Steel (4340)
Effect of cryogenic treatment on the mechanical properties of 4340 steel, 298
Steels
Analytical relations between hardness and strain for cold formed parts, 163
Stress rupture property
Influence of heat treatment on the microstructure and stress rupture property of DZ951 alloy, 315
Stretcher strains
Analysis and elimination of the stretcher strains on TH415 tinplate rings in the stamping process, 111
Strip breaks
Aluminum foil: Its typical quality problems and their causes, 125
Supercapacitor
Manganese oxide films for electrochemical supercapacitors, 356
Superplastic forming
Effect of layered microstructure on superplastic forming property of AA8090 Al–Li alloy, 214
Superplasticity
Diffusion bondability of similar/dissimilar light metal sheets, 87
Surface marks
Structure of the continuously cast Ni-based superalloy GMR 235, 200
Surface roughness
Influence of roller burnishing contact width and burnishing orientation on surface quality and tribological behaviour of Aluminium 6061, 272
Analysis of the surface roughness of tangential turn-milling for machining with end milling cutter, 279
Synthesis
Processing of mesoporous silica materials (MCM-41) from coal fly ash, 8

Tensile strength
Clustering effect on high temperature tensile behaviour of vanadium microalloyed steel, 246
Mechanical behavior of lightweight thermoplastic fiber–metal laminates, 284
Tension tests
Modelling the effects of superimposed ultrasonic vibrations on tension and compression tests of aluminium, 179
Thermal curing
Influence of thermal curing on the fabrication and properties of thin organosilane films coated on low carbon steel substrates, 259
Thermoplastic fiber–metal laminate
Mechanical behavior of lightweight thermoplastic fiber–metal laminates, 284
Thermoset plastics
Delamination analysis in drilling process of glass fiber reinforced plastic (GFRP) composite materials, 265
Thinning factor
Effect of layered microstructure on superplastic forming property of AA8090 Al–Li alloy, 214
Thrust force
Drilling of fiber reinforced plastics: A review, 1
TiBN
Structure and mechanical properties of TiBN coatings fabricated by dc reactive sputtering technique, 362
TiC
Laser deposited TiC/H13 tool steel composite coatings and their erosion resistance, 331
Tribometer
Influence of grain refinement and modification on dry sliding wear behaviour of Al–7Si and Al–7Si–2.5Cu cast alloys, 236
Turn-milling
Analysis of the surface roughness of tangential turn-milling for machining with end milling cutter, 279
Twin roll casting
Aluminum foil: Its typical quality problems and their causes, 125

Ultrasonic welding
Modeling of temperature distribution in ultrasonic welding of thermoplastics for various joint designs, 138
Ultrasonics
Modelling the effects of superimposed ultrasonic vibrations on tension and compression tests of aluminium, 179
Uniform thickness
Evaluation of copper coating ratio in steel/copper clad wire drwaing, 22
Upper bound method
Prediction of neutral plane and effects of the process parameters in radial forging using an upper bound solution, 147

Vickers hardness
Analytical relations between hardness and strain for cold formed parts, 163
Viscoelastic heating
Modeling of temperature distribution in ultrasonic welding of thermoplastics for various joint designs, 138

Wear
Influence of roller burnishing contact width and burnishing orientation on surface quality and tribological behaviour of Aluminium 6061, 272
Weibull distribution
Diffusion bondability of similar/dissimilar light metal sheets, 87
Wire drawing
Evaluation of copper coating ratio in steel/copper clad wire drwaing, 22
Work hardening
Influence of the structure of blanked materials upon the blanking quality of copper alloys, 27

XRD
Structure and mechanical properties of TiBN coatings fabricated by dc reactive sputtering technique, 362

Yield function
Yield function calibration for orthotropic sheet metals based on uniaxial and plane strain tensile tests, 221
